Safety Air Boy® 2 bar

Safety blowgun with automatic pressure reduction to below 2 bar

Safety Air Boy® blowgun with ø8mm straight pipe.

The Safety Air Boy blowgun is fitted with a pressure reduction valve inside the handle of the blowgun. Due to the construction, the outlet pressure is automatically limited to max 2 bar when the nozzle is blocked. This feature meets / exceeds the OSHA standard for output pressure (OSHA STD 1-13.1).

The noise level is minimal with a measured noise level of 68 dB at 8 bar and meets / exceeds the OSHA standard for occupational noise exposures (OSHA 1910.95 (b))

The JWL ergonomic design is a classic in itself. We use the compressed air to ease the activation of the handle making it easy, precise and simple to operate.

The Safety Air Boy® Classic is produced in an impact-resistant acetal plastic (POM)

Year Warranty Jahre Garantie ans de Garantie años de garantía års garanti

The durability of our blowguns is top notch - even after 28 million operations. Therefore, we are also proud to offer you a 25 year warranty on the valve system in your Air Boy® blowgun!
