

Air Boy Inflating gun

Easy and precise tyre inflating.

Inflating gun with a ø63mm manometer, twin connector and a 0.5 m hose.

Tyre pressure reduces over time. Around every fifth car is driving with an incorrect tyre pressure in one or more tyres*1. A wrong tyre pressure effects fuel consumption, safety and wear.

This inflating gun pumps all kinds of tyres, easily and precisely. The volume of air is infinitely adjustable and easily regulated using the trigger and the drain plug. We use the compressed air in the gun to ease activating the handle.

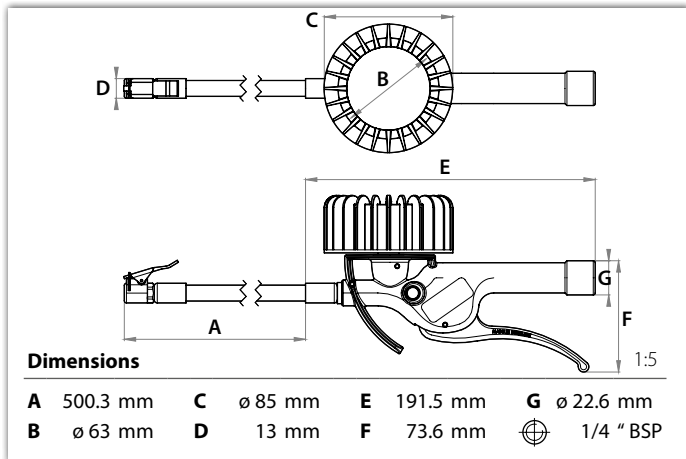

JWL inflating gun has a quality manometer(0-12 bar) in class 1,6 according to the standard EN 837-1. The exactness of the manometer is 0-12 bar: ±0,19 bar. The scale is in bar and psi.

The precision is tested on all JWL inflating guns during production.
