

Dropout® POINT OF USE LIQUID WATER REMOVER

Exceptional compressed air quality guaranteed.

The PDO300PA is a Compact Dropout® unit and is used as an inline point of use liquid water separator and contaminant remover. It can be used in a wide range of applications and offers exceptional flow rates.

PRODUCT OVERVIEW

- 10 cfm flow rate
- 15 bar maximum pressure
- >99.9999% liquid water removal
- 1 micron particulate removal
- Built-in auto-drain

Unlike traditional cyclonic separators which rely on constant and stable flows, Dropout® has the ability to maintain its performance levels during start up where it reaches optimum performance in a fraction of a second.
