# Hub Nut Removal Socket Set 1/2" Drv

Sizes: 17, 19, 21, 22, 24, 27mm + bar

## Features

- These sockets are specially designed for removing damaged hub nuts.
- These sockets can be used to remove nuts which cannot be loosened in a normal way because of rust and/or deformation.
- These sockets are made from SNCM439 with HRC 50-53 hardness.

## Operating Instructions

1. Choose an appropriate socket then place on the nut to be loosened and strike with a hammer.
2. Use a manual wrench to loosen the nut in an anti-clockwise direction.
3. Use the included bar to push the end of the nut stuck in the socket.

## Safety Precautions

- Do NOT use any impact driver.

## Caution

- Always wear safety glasses to protect eyes from any nut fragments.
