THE CANDO DIFFERENCE

COMMITTED TO EXCEPTIONAL AFTER MARKET SUPPORT.

- ▶ Includes an initial remote training consultation after purchase.
- ▶ Australian based technical support only a phone call away
- ▶ We regularly test local Australian vehicles for any updates required
- ▶ Regular updates & bug fixes (rather than waiting for bi yearly fixes)
- ▶ 2 years free updates for all vehicle categories
- ▶ No lock out once updates expire

FREQUENTLY ASKED QUESTIONS:

1. Almost all scan tools come from overseas, and their menus and databases do not match the Australian vehicle parc. We have all experienced it: the scan tool lists the wrong truck model or none at all.

CanDo Oceania is developed and tested in Australia using purpose-built, Australian-specific databases. Investment has been made where it matters, in local development for local vehicles.

2. A truck in a remote area has blown a PTO-driven pump, and the replacement requires a lower programmed engagement speed.

CanDo allows PTO programming offline and in real time. The menu structure uses OE-equivalent terminology, making it easy to follow engineering instructions accurately.

3. Sometimes you're stuck on an unfamiliar truck and just need guidance navigating the menu.

CanDo Oceania is backed by an experienced, qualified Australian support team. Our technicians are just a phone call away and available for remote assistance via TeamViewer.
