

Power Probe Tek

POWER PROBE®

5 Volt Reference Adapter #PPT5VA

The 5 Volt Reference Adapter:

This accessory attaches to the 4mm banana jack on your Power Probe circuit tester and limits the voltage output to 5-volts, this current limited output is useful when testing sensors and computer circuits.

Easily adapts to your Power Probe:

- Remove the tip and insert the 5-volt adapter.
- Attach the Power Probe's auxiliary ground lead to the ground tab on the 5 volt adapter.
- Reinstall the Power Probe tip.

Press the Power Probe switch forward, the LED on the adapter will glow indicating that 5 volts is getting sent to the tip.
